

Stunning Style

THESE NEW HAMPSHIRE homeowners selected Don Smith of Dream Kitchens to create their coveted culinary space. This large contemporary kitchen is finished with cherry cabinets and stainless steel appliances. A large multilevel island is central to the design. Custom low-voltage lighting enhances the feel of this beautiful place.

The clients were looking for a design that would take advantage of the high ceilings and long footprint of the existing kitchen. The island's large undermount sink is accented by a large commercial-style stainless steel faucet. Integrated seating and a built-in wine cooler also add to the island's appeal.

A 36-inch cooktop is crowned by a large stainless steel hood with a custom chimney. A remote exhaust unit in the attic provides unparalleled exhaust capability with none of the associated noise. Cold food storage is accomplished by using upright refrigeration with an additional two-drawer undercounter model.

The prep sink area provides true multitasking capability and allows for a large pantry. An undermounted stainless steel sink outfitted with a faucet from the same series as the main faucet complements the look. Storage is further maximized by tall pantries that flank the large palladium windows at the kitchen's end. Kitchen cabinets are topped with sparkling engineered-stone countertops that are accented by a stellar marine-blue hue. «
