

Old World Appeal

A SENSE OF TIMELESS ELEGANCE was exactly what this couple desired when they choose to renovate their kitchen. Desiring a complete transformation of their current space, the homeowners sought the assistance of Jacqueline Smith to make their dreams a reality.

After realizing the family's desire for additional space, the decision was made to make substantial modifications to many freestanding elements. The porch was thus included as a part of the room, the wall between the dining room and kitchen was removed, and the back wall was pushed out eight feet.

The tone and ambiance of the space was understood from the beginning. The couple wanted a warm Old World look with abundant light, rich paint colors, and stainless steel appliances. The cabinetry incorporated several details and special features and was finished with a warm brown glaze. The doors embraced a more simplistic style, allowing the detail of the cabinets to be accentuated.

The final design is the result of collaboration between the designer and the homeowners. Their efforts created a warm, welcoming environment, that now serves as the center for family entertainment. ■
