

## Dream Kitchens

**OVER THE LAST TWENTY-ONE YEARS, DREAM** Kitchens has earned more than 175 awards for best value and best design. What sets Dream Kitchens apart from the rest? It's more than just the ability to design beautiful kitchens, it's the company's pledge to increase storage and counter space by at least 30 percent. Nina Hackel, president of Dream Kitchens, has a passion and creativity that hasn't cooled over the years. She and five other designers create award-winning kitchen and bath designs at Dream Kitchens in Nashua, New Hampshire. Hackel believes in creating spaces that make every multitasking parent's life easier; where the television is visible, the kids are in view and the dishes are getting done, all at the same time. The designers

at Dream Kitchens start each project with an in-depth client consultation. Clients then receive three unique designs for their project, along with objective opinions and guidance about the pros and cons of each layout. "Our designers pride themselves on the ability to creatively solve challenges of budget, space, function, and style, to ultimately provide a dynamic new lifestyle for each client," Hackel says "Dream Kitchens is committed to making your kitchen a WOW." Dream Kitchens's focus is on giving the client the best possible layout, beautifully paired with functionality. These are the keys to making every client's dream a reality. Exceptional kitchens by Dream Kitchens.
